*Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 05-16-05 has been entered.

The following is an examiner's statement of reasons for allowance: The examiner could not find fair suggestion for the delay stage of a ring oscillator with active load with pair of MOSFETs and selectable resistive or capacitive load in addition to all else claimed.

The references to Abbasi et al(US 6,831,492), Marbot (US 5,334,891) and Kovacs et al(5,793,239) are prior art that disclose active loading with MOSFETs, however, they do not show selectable resistive or capacitive elements coupled in series to the MOSFETs or the physical media attachment implementation in claim 23, for example. The new art cited by applicant(05-16-05) do not show these features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled " Comments on Statement of Reasons for Allowance."
